Patrick Coveney, Chief Executive Officer, commented:

"We have made good progress on our strategic agenda during the first half of the year, despite the fact that market conditions throughout the period proved very challenging. In the UK, we have completed the Uniq integration with the restructuring of the desserts business and the disposal of the Minsterley facility, and the integration of International Cuisine is progressing well. In the US, MarketFare and Schau have been integrated and, since the end of April, we are supplying Starbucks from four of our six facilities there.

However the UK retail environment remains under severe pressure and this was exacerbated in Q2 by the horsemeat scandal, which has temporarily driven the ready meals market lower.

Although we expect market conditions to remain tough, we remain confident in our ability to deliver adjusted EPS growth for the financial year in line with expectations."

About Greencore

- A leading manufacturer of convenience food in the UK and the US
- Strong market positions in the UK convenience food market across food to go, chilled prepared meals, chilled soups and sauces, ambient sauces & pickles, cakes & desserts and Yorkshire puddings
- A fast growing food to go business in the US, serving both the convenience and small store channel and the grocery channel

SUMMARY

Portfolio and Strategy

During H1 13, we have further cemented the transformation the Group underwent in FY12 to form a business with clear scale and a balanced customer mix:

- In the UK, we completed the integration of Uniq with the transfer of all premium desserts production to the refurbished Evercreech facility and the disposal of the Minsterley facility. The integration of International Cuisine is progressing well.
- In the US, both MarketFare and Schau were integrated, the product portfolio in the Newburyport facility was rationalised and supply to Starbucks commenced under a multi-year, multi-site contract.

This focused portfolio, together with good operating and financial discipline, have enabled us to deliver strong growth in adjusted EPS in the half despite the challenging market conditions.

Financial and Operating Performance^{1, 2}

Group revenue increased in the period by 0.9% to £572.9m with growth in the Convenience Foods division of 1.8% to £542.1m. Growth rates in our core markets in the UK were lower than in the prior year, even before the impact of the horsemeat scandal on the ready meals category. Despite this, Group operating profit increased by 6.3% to £33.7m as we maintained good operating and financial discipline and delivered improvements in returns in lower margin businesses.

Adjusted earnings per share were 10.9% higher at 6.1 pence as a result of the growth in operating profit combined with lower year-on-year financing costs and a continued low effective tax rate due to historic tax losses.

Interim Dividend

The Board of Directors is announcing an interim dividend of 1.90p. It remains the Board's intention to increase the total dividend distribution for the financial year in line with the growth in adjusted earnings per share.

OUTLOOK

We expect market conditions to remain tough during FY13, particularly in the core UK market which shows little or no volume growth and where the ready meals category, which represents c. 15% of Group revenue, is still to recover fully from the horsemeat scandal.

However, the Group is strategically well positioned to confront these challenges given its balanced customer portfolio and exposure to faster growing convenience categories. We continue to see moderating input cost inflation and now expect this to be 2% or below for the financial year. With the tight financial controls we have in place, we remain confident in our ability to deliver adjusted EPS growth for the financial year in line with expectations.

OPERATING REVIEW 1,2,3

Convenience Foods

Revenue and Operating Profit

	H1 13 £m	H1 12 £m	Change
Revenue	542.1	532.6	+1.8%
Operating profit	32.1	30.7	+4.7%
Operating margin	5.9%	5.8%	+10bps

^{*}The impact of currency was not material

Reported revenue in the Convenience Foods division increased by 1.8% in the period to £542.1m. This was significantly impacted by changes in the portfolio during the period.

In the UK, like-for-like revenue (that is excluding both the International Cuisine acquisition and the Uniq desserts activities which were exited or sold) was 1.3% lower. This was due mainly to the impact of the horsemeat scandal on the ready meals business and to lower market growth rates as economic conditions continue to exert pressure on the consumer.

In the US, revenues more than doubled through the net impact of the acquisitions of MarketFare and Schau, as well as portfolio rationalisation in the 'legacy' business, particularly in Newburyport.

Despite the challenging conditions, operating profit increased by 4.7% to £32.1m as we maintained strong financial discipline and delivered improvements in returns in lower margin businesses.

UK Convenience Foods

Food to Go

The UK Food to Go business represents approximately 40% of Convenience Foods revenues and comprises sandwiches, sushi, snack and side of plate salads.

Both the sandwiches sub-category and the broader chilled food to go market experienced lower growth than seen in recent periods. The sandwich sub-category grew by 1.8% in the period while the broader chilled food to go market (sandwiches, sushi and salads) experienced a 0.2% decline. This was predominantly weather related and compared to a period of strong growth in the prior year.

Against this backdrop, revenue in the combined Food to Go business grew by 0.1%. Good gains in listings were made across the Food to Go range in a major retail customer, although overall new business wins were more modest than in the previous year.

Prepared Meals

The Prepared Meals business comprises chilled ready meals, quiches, chilled soup and chilled sauces. The chilled ready meals market saw growth moderate to 3.1% in the period, while the Italian ready meals market, our major sub-category, experienced a 1.8% decline. This was predominantly driven by the impact of the horsemeat scandal which affected the broader processed beef market from late January. Although all industry tests on chilled products were negative for the presence of horsemeat, the chilled ready meals market, in particular Italian meals, was negatively impacted in Q2. The quiche market exhibited more robust performance against a softer comparative with 4.5% growth and the soups market benefitted from poor weather with 10.4% growth.

The Prepared Meals business grew revenue by 10.7% in the period due primarily to the acquisition of the International Cuisine business. On a like-for-like basis (excluding the acquisition of International Cuisine), revenue was 5.9% lower as a result of the decline in ready meals. Across other product categories, namely soup, sauces and quiche, the business performed well, growing in line with, or exceeding, market growth rates. The integration of the International Cuisine business, acquired in August 2012 is progressing as planned. The business is performing well, albeit with some impact from the horsemeat scandal.

More than 200 tests were conducted for the presence of horsemeat on both Greencore finished products and ingredients. All tests were negative at the Food Standards Agency's 1% threshold, except one positive test carried out by Asda, who withdrew the product. A thorough and detailed investigation, including further extensive testing, concluded there was no evidence of contamination and the product was subsequently put

back on shelf by Asda. As a response to the broader issue, additional species screening procedures were introduced throughout the supply chain for beef-related ingredients and we continue to work with our customers to rebuild consumer confidence in the supply chain.

Grocery and Frozen

The Grocery and Frozen business provides meal components with Grocery activity focused on cooking sauces, table sauces and pickles and Frozen supplying Yorkshire Puddings. The own label cooking sauce market was flat in the period whilst Yorkshire Puddings grew by 3.1% in value terms.

The businesses performed well with overall revenue growth of 4.5%. This was driven by gains in cooking sauces in the discounter sub-channel and in Yorkshire Puddings in major multiples.

Cakes and Desserts

The Group's cakes and desserts activity includes the Hull facility, the food service desserts facility in Taunton and the chilled desserts facility in Evercreech. The largest sub-category in which we participate, celebration cakes, declined by 3.6% in the period. The cheesecake sub-category, in which we also participate, continued to exhibit good growth.

Overall, Cakes and Desserts revenues were 2.9% lower on a like-for-like basis. The Hull facility experienced modest growth in the period and delivered stronger financial performance than in recent periods due to operational improvements and a lower inflationary environment.

The Food Service desserts business saw modest revenue decline in a tough market; during the period, the business secured additional volumes with a key customer which should underpin growth over the next twelve months.

The refurbishment of the Evercreech facility was completed during the period and the remaining premium desserts lines were all successfully transferred from the Minsterley facility. The disposal of the Minsterley facility was completed at the beginning of January.

US Convenience Foods

The US business has been transformed with the acquisitions in H2 12 of MarketFare and Schau and with the addition of Starbucks as a material new customer. Reported revenues were over 120% higher following the acquisitions. The 'legacy' business in Newburyport and Brockton experienced some planned revenue decline as we decided to exit several unprofitable product lines. This has left a much tighter product portfolio concentrated on food to go and salads. The rationalisation at Newburyport reduced complexity prior to the successful launch of a food to go range for Starbucks in January in the Boston area. Subsequent to the period end, the business has successfully commenced supply to Starbucks from the Jacksonville, Fredericksburg and Chicago facilities.

The MarketFare and Schau businesses have been integrated and we continue to build out capability in the combined business with a blend of assignments from the UK business and local hires. Overall financial performance was enhanced through a combination of the acquired profit streams, tighter product portfolio and combinational benefits.

Ingredients & Property

	H1 13 £m	H1 12 £m	Change Actual Currency	Change Constant Currency
Revenue	30.8	35.1	-12.4%	-9.4%
Operating profit	1.6	1.0	+53.4%	+57.8%

The Ingredients & Property division accounts for around 5% of Group activity. The revenue decline in the period was driven by the edible oils trading activity while the molasses feed business benefitted from the poor weather, reducing grass growth. Despite lower revenues overall, operating profit benefitted from better mix in oils and the growth in molasses revenues.

The planning consent on the Littlehampton site is now definitive and marketing will commence over the next few months as planned. As detailed in the note to the financial statements on exceptional items, the Group has recognised an exceptional charge of £9.2m in the period related to its Irish property portfolio. This comprises an impairment charge following the rezoning of one of the former production facilities and reflecting the continued soft property market, together with a charge for the expected costs to complete the remediation of the former Irish sugar sites.

FINANCIAL REVIEW 1,2

Revenue and Operating Profit

Revenue in the period was £572.9m, an increase of 0.9% versus H1 12. Group operating profit of £33.7m was 6.3% ahead of the prior year. Operating margin of 5.9% was 30 basis points higher than H1 12.

The impact of currency in the period was a modest reduction in revenue and operating profit, predominantly driven by the relative strengthening of sterling against the euro compared with H1 12.

Interest Payable

The Group's bank interest payable in H1 13 was £7.7m compared to £8.1m in H1 12. This was driven by a lower effective interest rate on the Group's primary bank facilities. The composition of the charge was £7.1m of interest payable, commitment fees for undrawn facilities of £0.3m and an amortisation charge in respect of facility fees of £0.3m.

Non-Cash Finance Charges/Credit

The Group's net non-cash finance charge in H1 13 was £0.1m (£0.2m credit in H1 12). The change in the fair value of derivatives and related debt adjustments was a non-cash credit of £1.9m (£2.5m credit in H1 12) reflecting the impact of marking to market the Group's interest rate swap portfolio. The non-cash pension financing charge of £1.9m was lower than the £2.4m charge in H1 12 and reflects a reduction in interest rates and lower expected return on assets. The charge in respect of the increase in the present value of assets and liabilities held was £0.1m (£0.1m credit in H1 12).

Taxation

The Group's effective tax rate in H1 13 (including the tax impact associated with pension finance items) was 1% compared to a rate of 4% in FY12.

The Group's effective tax rate continues to benefit from historic tax losses. The reduction in the period reflects the enactment of changes in corporation tax rates in jurisdictions where the Group operates and the net movement in current and deferred tax provisions.

Exceptional Items

The Group recognised a net exceptional credit in the period of £0.4m. The breakdown is as follows:

- a charge of £2.2m in connection with (i) the completion of the integration of the Uniq business including the Chilled Desserts restructuring and (ii) the integration of the International Cuisine business acquired in August 2012:
- a charge of £1.1m in connection with the integration of the acquisitions of MarketFare and Schau in the US;
- a charge of £9.2m related to the Group's Irish property portfolio. This comprises an impairment charge of £4.3m following the change in zoning of a large area owned by the Group together with continued soft property market conditions, and an additional charge of £4.8m in connection with the remediation of the former sugar processing sites;
- a credit of £4.4m representing a curtailment gain in connection with the Greencore Group pension scheme;
- a tax credit of £7.8m in connection with the resolution of a number of tax positions, including the settlement of an overseas tax case: and
- a tax credit of £0.7m in connection with the UK integration costs.

Earnings per Share

Adjusted earnings of £23.8m in the period were 12.9% ahead of the prior year. Adjusted earnings per share of 6.1 pence were 10.9% ahead of H1 12.

Cash Flow and Net Debt

A net cash inflow from operating activities of £5.3m was recorded compared to an inflow of £7.8m in H1 12. The modest reduction in inflow was primarily due to a larger seasonal working capital outflow in the half than in H1 12 which benefitted from reductions of working capital in the former Uniq businesses.

Capital expenditure of £18.4m was incurred in the period compared to £14.1m in H1 12 with the increase driven predominantly by the acquisition of the freehold of the Bristol facility and expenditure in acquired businesses. Interest costs of £7.5m were paid in the period with cash dividends to equity holders of £4.8m.

The Group's net debt at 29 March 2013 was £272.6m, an increase of £14.6m from 28 September 2012. This increase was driven by the seasonal working capital outflow and higher capital expenditure, together with an adverse movement in the translation of US dollar debt of £5.0m. There were no movements on the Group's committed debt facilities other than a movement in drawings under the Group's revolving credit facility.

Pensions

The net pension deficit (before related deferred tax) increased to £155.9m at 29 March 2013 from £141.8m at 28 September 2012. The net pension deficit after related deferred tax was £126.0m, an increase of £10.1m from 28 September 2012.

The fair value of total plan assets relating to the Group's defined benefit pension schemes (excluding associates) increased to £378.2m at 29 March 2013 from £345.7m at 28 September 2012. The present value of the total pension liabilities for these schemes increased to £533.5m from £486.9m over the same period. Liabilities increased more quickly than asset values as there was a material increase in UK inflation expectations despite a further fall in discount rates.

All defined benefit pension scheme plans are closed to future accrual and the Group's pension policy with effect from 1 January 2010 is that future service for current employees and new entrants is provided under defined contribution pension arrangements.

Subsequent to the period end, the Group entered into arrangements with the Hazlewood Foods Defined Benefit Pension Scheme Trustees to address £40m of the actuarial deficit in the scheme through an asset backed structure. The substance of this arrangement is to reduce the cash funding which would otherwise be required based on the latest triennial valuation, whilst improving the security of the pension scheme members' benefits. This agreement is described in more detail in note 15 to the condensed financial statements.

Related Party Transactions

There were no related party transactions in the half year that have materially affected the financial position or performance of the Group in the period. In addition, there were no changes in related party transactions from the last Annual Report that could have had a material effect on the financial position or performance of the Group in the first six months.

Principal Risks and Uncertainties

There are a number of potential risks and uncertainties which could have a material impact on the Group's performance over the remainder of the financial year and could cause actual results to differ materially from expected and historical results. In particular, the timing and pace of recovery in consumer demand in the chilled ready meals market following the horsemeat scandal remains uncertain. The Board considers the risks and uncertainties described on pages 14 and 15 of the Annual Report and Accounts for the year ended 28 September 2012 issued on 27 November 2012 to remain applicable. These risks are as follows:

Strategic risks

- Competitor activity
- Expansion

Commercial risks

- Changes in consumer behaviour and demand
- Loss of key customer relationships
- Commodity price / input cost fluctuations

Operational risks

- Food safety, environmental and health and safety
- Loss of manufacturing capability
- Loss of key personnel

Financial risks

- Interest rates, foreign exchange rates, liquidity and credit
- Employee retirement obligations

NOTES TO THE GROUP CONDENSED FINANCIAL STATEMENTS

1. Basis of Preparation

The Group Condensed Financial Statements have been prepared in accordance with the Transparency (Directive 2004/109/EC) Regulations 2007, the related Transparency Rules of the Irish Financial Services Authority and with IAS 34 Interim Financial Reporting as adopted by the European Union.

These Condensed Financial Statements do not comprise statutory accounts within the meaning of Section 19 of the Companies (Amendment) Act 1986. The Group condensed financial information for the year ended 28 September 2012 represents an abbreviated version of the Group Financial Statements for that year. Those financial statements, upon which the auditor issued an unqualified audit report, have been filed with the Registrar of Companies.

After making enquiries, the directors have a reasonable expectation that the Group has adequate resources to continue operating for the foreseeable future. For this reason, they continue to adopt the going concern basis in preparing the Group Condensed Financial Statements.

2. Accounting Policies

The accounting policies and methods of computation adopted in the preparation of the Group Condensed Financial Statements are consistent with those applied in the Annual Report for the financial year ended 28 September 2012 and are as set out in those financial statements.

The adoption of new standards and interpretations (as set out in the 2012 Annual Report) that became effective for the Group's financial statements for the year ended 27 September 2013 did not have any significant impact on the Group Condensed Financial Statements.

3. Segment Information

The Group is organised around different product portfolios. The Group's reportable segments under IFRS 8 are as follows:

Convenience Foods - this reportable segment is the aggregation of two operating segments, Convenience Foods UK and Convenience Foods US. This segment derives its revenue from the production and sale of convenience food.

Ingredients & Property - this segment represents the aggregation of 'all other segments' as permitted under IFRS 8 (IFRS 8 specifies that, where the external revenue of reportable segments exceeds 75% of the total Group revenue, it is permissible to aggregate all other segments into one reportable segment). The Ingredients & Property reportable segment derives its revenue from the distribution of edible oils, molasses and the management of the Group's surplus property assets.

The Chief Operating Decision Maker monitors the operating results of segments separately in order to allocate resources between segments and to assess performance. Segment performance is predominantly evaluated based on operating profit before exceptionals and acquisition related amortisation. Exceptional items, net finance costs and income tax are managed on a centralised basis, therefore, these items are not allocated between operating segments for the purposes of the information presented to the Chief Operating Decision Maker and are accordingly omitted from the segmental information below. Intersegment revenue is not material.

4. Seasonality

The Group's convenience foods portfolio is second half weighted. This weighting is primarily driven by weather and seasonal buying patterns impacting, in particular, the demand for chilled product categories.

(a) Integration cost of UK acquisitions

During the period, the Group incurred an exceptional charge of £2.2 million in connection with (i) the completion of the integration of the Uniq business, including the Chilled Desserts restructuring, and (ii) the integration of the International Cuisine business acquired in August 2012. In the prior period, integration costs of £3.4 million were incurred in respect of the Uniq acquisition.

(b) Integration cost of US acquisitions

During the period, the Group incurred an exceptional charge of £1.1 million in connection with the integration of the acquisitions of MarketFare Foods LLC ("MarketFare") and H.C. Schau & Son Inc. ("Schau") in the US.

for the half year ended 29 March 2013

NOTES TO THE GROUP CONDENSED FINANCIAL STATEMENTS

5. Exceptional Items (continued)

(c) Pension curtailment gain

During the period, the Group recognised a curtailment gain of £4.4 million as the trustees of the Greencore Group pension scheme resolved to pass on the cost of the Irish pensions levy to beneficiaries of the pension scheme in the form of a reduction in future pension payments. The cost of the levy has previously been assumed to be borne by the scheme and had been treated as a reduction in assets of the scheme when paid and as an increase in scheme liabilities for future amounts payable.

(d) Property related charge

During the period, the Group recognised a property related charge of £9.2 million arising on its Irish property portfolio which comprises a property impairment charge together with a charge for remediation costs relating to the former sugar processing sites. The property impairment charge of £4.3 million arose due to the rezoning of a large proportion of the Group's property assets in Ireland, together with the continued softening of demand for land and the related impact on prices being achieved on sales. The Group also re-evaluated the expected costs to be incurred in meeting the requirements of the Environmental Protection Agency regarding the remediation of the former sugar processing sites and an additional charge of £4.8 million was recognised in this respect.

(e) Exceptional tax credit

During the period, a tax credit of £7.8 million arose as the Group resolved a number of tax positions including the settlement of an overseas tax case. A tax credit of £0.7 million was recognised in respect of exceptional charges in the period.

6. Taxation

Interim period tax is accrued using the tax rate that is estimated to be applicable to the expected total annual earnings based on tax rates that were enacted or substantively enacted at the half year end, that is the estimated average annual effective income tax rate based on management's judgement applied to the taxable income of the interim period.

7. Dividends Paid and Proposed

A dividend of 2.5 pence per share was approved at the Annual General Meeting on 29 January 2013 as a final dividend in respect of the year ended 28 September 2012 and a total of £5.8 million was paid on 3 April 2013 to those shareholders that did not avail of the Group scrip dividend scheme.

An interim dividend of 1.90 pence (2012: 1.75 pence) per share is payable on 3 October 2013 to the shareholders on the Register of Members as of 7 June 2013. The ordinary shares will be quoted exdividend from 5 June 2013. The dividend will be subject to dividend withholding tax, although certain classes of shareholders may qualify for exemption.

The liability in respect of this interim dividend is not recognised on the Balance Sheet of the Group as at 29 March 2013 because the interim dividend had not been approved at the balance sheet date (but was subsequently declared by the Directors of the Company).

8. Earnings per Ordinary Share

Basic earnings per ordinary share

Basic earnings per ordinary share is calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of ordinary shares in issue during the period, excluding ordinary shares purchased by the Company and held as treasury shares and shares held in trust in respect of the Deferred Bonus Plan Awards scheme. The adjusted figures for basic and diluted earnings per ordinary share are after the elimination of exceptional items, the effect of foreign exchange (FX) on inter-company and external balances where hedge accounting is not applied, the movement in the fair value of all derivative financial instruments and related debt adjustments, the amortisation of acquisition related intangible assets and the effect of pension financing.

Diluted earnings per ordinary share

Diluted earnings per ordinary share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. Employee share options, which are performance based, are treated as contingently issuable shares, because their issue is contingent upon satisfaction of specified performance conditions in addition to the passage of time. These contingently issuable ordinary shares are excluded from the computation of diluted earnings per ordinary share where the conditions governing exercisability have not been satisfied as at the end of the reporting period. Options over 8,557,582 (2012: 8,644,081) shares were excluded from the diluted EPS calculation as they were either antidilutive or contingently issuable ordinary shares which had not satisfied the performance conditions attaching at the end of the reporting period.

9. Intangible Assets, Property, Plant and Equipment, Investment Property, Capital Expenditure and Commitments

During the six month period to 29 March 2013, the Group made approximately £15.7 million (2012: £13.5 million) of additions to property, plant and equipment, investment property and intangible assets. The Group also disposed of certain assets with a carrying amount of £4.0 million (2012: £0.5 million) for proceeds of £4.0 million (2012: £4.1 million).

At 29 March 2013, the Group had entered into contractual commitments for the acquisition of property, plant and equipment amounting to £4.0 million (2012: £4.1 million).

10. Equity Share Capital

Issued capital as at 29 March 2013 amounted to £117.6 million (28 September 2012: £120.9 million) of which £2.1 million (28 September 2012: £2.1 million) is attributable to treasury shares, £0.02 million (28 September 2012: £0.02 million) is attributable to shares held by the Deferred Share Awards Trust and £111.5 million (28 September 2012: £114.9 million) is attributable to deferred shares. During the six month period to 29 March 2013, 2,678,410 shares (2012: 1,408,619) were issued in respect of the scrip dividend scheme and 181,125 shares (2012: none) were issued in respect of the Group's Sharesave schemes. In addition, 384,815,847 deferred shares in the Company were cancelled on 4 January 2013.

Pursuant to the Deferred Bonus Plan Awards scheme, 727,885 shares were purchased by the Trustees of the Plan during the period ended 29 March 2013. In addition, the Trustees utilised dividend income of £0.03 million (2012: £0.03 million) to acquire 32,111 (2012: 69,490) shares in the Group with a nominal value of £0.001 million. In the period, 1,402,077 (2012: 1,292,223) shares with a nominal value of £0.013 million were transferred to beneficiaries of the Deferred Bonus Plan.

During the period, no share options were granted under the Executive Share Option Scheme (2012: 575,000), no share options were granted under the Sharesave schemes (2012: nil) and 2,473,607 shares were awarded under the Deferred Bonus Plan Awards scheme (2012: 3,477,711).

Pursuant to the resolutions passed at the Company's Annual General Meeting, the directors were authorised to adopt the Greencore Group plc 2013 Performance Share Plan. During the period, 4,298,604 conditional share awards were granted in accordance with the terms of this plan.

NOTES TO THE GROUP CONDENSED FINANCIAL STATEMENTS

12. Provision for Liabilities (continued)

The significant provisions are as follows:

Leases

Lease provisions consist of (a) provisions for leasehold dilapidations in respect of certain leases, relating to the estimated cost of reinstating leasehold premises to their original condition at the time of the inception of the lease as provided for in the lease agreement; and (b) provisions for onerous contractual obligations for properties held under operating lease. It is anticipated that these will be payable within seven years.

Remediation and closure

Remediation and closure obligations were established to cover either a statutory, contractual or constructive obligation of the Group.

In the Ingredients & Property segment, remediation and closure obligations primarily relate to the closure of Irish Sugar and the exit from sugar processing.

In the Convenience Foods segment, the restructuring provision was established to cover the cost of withdrawal from yoghurt production and exiting everyday desserts to focus on the premium desserts and Müller/Cadbury desserts business.

Other

Other provisions primarily consist of provisions for litigation and warranty claims arising from the sale and closure of businesses, together with a provision for liabilities which are self insured.

13. Contingencies

The Group and certain of its subsidiaries continue to be subject to various legal proceedings relating to its current and former activities. Provisions for anticipated settlement costs and associated expenses arising from legal and other disputes are made where a reliable estimate can be made of the probable outcome of the proceedings.

The Greencore Group Pension Scheme ("the Scheme") has a mortgage and charge relating to certain property assets of the Group with a carrying value of £5.1m (2012: £11.3m) for use as a contingent asset of the Scheme. Under the terms of the mortgage and charge, should a disposal of these property assets occur that meets the terms of the mortgage and charge, the Scheme is entitled to a portion of the sale proceeds. The maximum amount recoverable by the Trustees of the Scheme under the mortgage and charge is the amount required for the Scheme to meet the minimum funding standard under the Pension Acts 1990-2009. During the period £0.6m (2012: £nil) was paid to the Scheme in accordance with this arrangement.

14. Retirement Benefit Schemes

In consultation with the independent actuaries to the schemes, the valuation of the pension obligations has been updated to reflect current market discount rates, rates of increase in salaries, pension payments and inflation, current market values of investments and actual investment returns.

The principal actuarial assumptions are as follows:

	March 2013		September 2012	
	Ireland	UK	Ireland	UK
Rate of increase in pension payments	*0%	3.15%	*0%	2.60%
Discount rate	3.65%	4.50%	4.00%	4.60%
Inflation rate	1.90%	3.35%	1.90%	2.70%

^{*} The pension increase rate shown above applies to the majority of the liability base, however, there are certain categories within the schemes that have an entitlement to pension indexation and this is allowed for in the calculation.

^{*} Restriction in IAS 19 on recognition of a surplus in a defined benefit plan that cannot be recovered through refunds or reductions in future contributions.

15. Subsequent Events

On 10 May 2013, the Group entered into arrangements with the Hazlewood Defined Benefit Scheme Trustees to address £40m of the actuarial deficit in the scheme. The substance of this arrangement is to reduce the cash funding which would otherwise be required based on the latest triennial valuation, whilst improving the security of the pension scheme members' benefits. As part of these arrangements, the Pension Scheme has acquired an interest in a Group subsidiary which entitles it to a distribution from the profits of the subsidiary of the Group semi-annually for 15 years 11 months. Under IAS 19, distributions to the Scheme will be reflected in the Group Financial Statements as contributions paid on a cash basis.

16. Acquisition of Undertakings

2012 Acquisitions

On 17 April 2012, the Group acquired 100% of MarketFare which is a leading manufacturer of food to go products for convenience and small stores in the US with facilities in Salt Lake City, Utah and Fredericksburg, Virginia. The acquisition builds additional scale with its key customer, 7-Eleven, and provides new competencies to Greencore USA.

On 21 June 2012, the Group acquired 100% of Schau, a fresh food manufacturer with facilities in Chicago, Illinois and Jacksonville, Florida. The acquisition forms a critical part of the supply network for a significant new multi-regional contract gain with Starbucks in the food to go category.

On 23 August 2012, the Group acquired 100% of International Cuisine Limited ("ICL"), a private label chilled ready meal business with a facility in Consett, County Durham. The acquisition provides additional capacity for the Group in the ready meals category in the UK and complements our existing business.

Total consideration	43,940	265	44,205

At 29 March 2013, the fair values of the acquired net assets of Schau and ICL have been determined provisionally and are subject to change, as the Group has yet to finalise the fair value of all the identifiable net assets acquired. The fair values of the acquired net assets of MarketFare have now been finalised. The fair value of the acquired net assets of all acquisitions have been adjusted retrospectively and the Group Balance Sheet at 28 September 2012 has been adjusted to reflect the effect of these adjustments.

2011 Acquisitions

On 23 September 2011, the Group's acquisition of Uniq was declared unconditional in all respects. The acquisition provided further critical mass in the Food to Go market and exposure to the premium chilled desserts market, in both cases with a major retail customer with which the Group previously had little trade.
