

# Environmental Policy Statement

the  
Greencore  
way

As a food manufacturer with sites in the UK and Ireland, we understand that we need to reduce our impact on the planet.

## What we stand for

We know that protecting our planet is important and that's why our sustainability strategy is a key part of the Greencore Way (how we do things). We are committed to keeping the environment clean; stopping pollution before it happens and always working on doing better for the planet.

## Our commitments include:

- Training our team members on the environment, backed up with effective policies and procedures, to make sure everyone understands how they can reduce our impact.
- Cutting our carbon footprint by using energy, fuels and coolants smartly, cutting down on travel and switching to renewable energy where possible.
- Being a good neighbour to our local communities and to nature, while playing our part in protecting biodiversity in the wider world through our supply chain.
- Figuring out how climate change affects our business and adapting to reduce any negative impacts, while taking advantage of new opportunities.
- Setting and regularly reviewing environmental goals, so we keep improving our environmental performance.
- Saving water, while keeping things clean and safe and encouraging our colleagues to do the same.
- Being smart about how we use resources and reducing waste by trying not to create it in the first place and following the waste hierarchy.
- Following environmental rules and regulations, meeting industry standards and supporting our customers' environmental journeys.

## Our responsibilities

We all need to do our bit to care for the environment.

Speak up if you've got concerns or ideas about the environment and don't be afraid to take them further if needed.

Let's all lead the way when it comes to reducing our impact on the planet.

Thank you for playing your part.
